Earlier this week, Northampton County informed SEIU Local 668 that they would be ending telework and bringing workers back to their worksites beginning Monday, May 18th.

This is a poorly-planned decision that will put the lives of our members, their family members, and the general population all at-risk of contracting COVID-19.

We're asking members, friends, family members, and community residents to speak-out against this unnecessary and perilous decision to force more than 250 workers to stop teleworking and instead move back into unsafe worksites.

Tell the Northampton County Council that they need to protect their workers and that telework must be continued by submitting emails to all members of the county council now!

Complete this form to send emails in support of Northampton workers and share it today:
